PROFESSIONAL EXPERIENCE

Full Stack Developer — L'workshop (Startup)

May 15 – June 15, 2025

- Developed a full-stack TravelLogistic platform using the MERN stack (MongoDB, Express, React/Next.js, Node.js).
- Implemented a multi-role interface (clients, drivers, managers, administrators) for real-time trip management and tracking.
- Integrated advanced features: instant messaging, GPS tracking, and secure user management.

PROJECTS

Insurance Management Console Application

- Java 8 console application for digitizing insurance operations.
- Layered architecture (Service/DAO) with JDBC for maintainability.
- Utilized Streams and Lambdas for efficient data processing and business logic.

Youdemy – Course Management Platform

- Full-stack e-learning platform for students, teachers, and administrators with role-based functionalities.
- PHP/MySQL backend handling authentication and course management.
- Responsive frontend built with JavaScript and Tailwind CSS for smooth user experience.

EDUCATION

Web developpement

2024 - 2026

YOUCODE - UM6P

High School Diploma in Sharia Sciences

2022 - 2023

Lycée Sidi Mohamed Ben Abdellah

ADDITIONAL INFORMATION

- **Languages:** English – Intermediate, French – Intermediate , Arabic – Native.
- **Certifications:** Introduction to Java Enterprise Edition (EE) — LearnQuest , Java Programming for Beginners — IBM , Complete Java Training for Beginners — Udemy.
